

Workshop with Katharine Henegan
“Sacred Geometry”

- Saturday, March 21, 2020
- 10:00 AM 4:30 PM

This 1st level workshop is for anyone wanting to learn the basis of Sacred Geometry and how we move from intuitive perception to the basis of meaning. We will begin to explore and understand the grid system (*matrix*), understand different dynamics and measurements within basic forms, and how these can be used to apply concept and meaning through creative expression. By doing this, you will gain insight as to how Mandalas, Yantras and other forms of Sacred Geometry come into existence and learn to experiment with your own.
